

Information on ATRAX-4

ATRAXIAN STAR SYSTEM

Situated next to the 4th Sector of the 38th Quadrant of the Varn Empire, the Atraxian Star System is the next target of the Empire's never ending conquest.

WEAKNESSES AND STRENGTHS OF THE ATRAXIAN STAR SYSTEM

- The Atraxians never communicated with the Varnians in any intelligible way despite having achieved inter-planetary space travel. As such, they are unlikely to know the might of the Varn Empire and are sure to be taken by surprise when the attack will begin.
- However, the information that has been gathered about this civilization tells us that the Atraxians are highly organized and will be a threat if they have the time to prepare.

Victory is assured, the main goal is to waste a minimum of resources.

ATRAX-4

ATRAX-4 is the only naturally habitable planet of the system and is, despite having only 24% of the population, where is produced 94% of Atraxian resources. As such, this planet naturally is a key point in the strategy to conquer the star system.
